# Introduction

The field of Ophthalmology has been advancing in a dizzying pace, making it increasingly hard to follow all developments in the field, especially in matters of specialized training.

These four educational seminars on Ophthalmology, organized by the Educational Ophthalmology Institute of Athens Eye Hospital in collaboration with Cambridge University, are specially designed to cover all advancements in the field of Ophthalmology.

The program offers the unique opportunity to the Greek audience to attend seminars prepared and presented by both Greek and foreign scientists with extended research experience in their respected fields.

The seminars are available for specialized Ophthalmologists to offer a better understanding and provide insight in the latest developments of Ophthalmology.

We invite you to participate, actively and effectively, by attending the courses and the online educational material, so that this distribution of knowledge becomes a valuable learning experience for you and your colleagues.
